XFENCE OTTER
SPECIFICATION SHEET

This predator otter Xfence has been designed to protect inland fisheries and facilitate highway exclusion.

This type of fence is produced to a very high specification, which makes it particularly suitable for commercial and government sectors. Shorter heights and lighter gauges, coupled with electric fencing can be more cost effective for private enterprises.

Benefits

- Superior alu/zinc coated wire, lasts 3-4 longer than galvanised wire
- Premium primary wires only used in Xfence fabricated netting
- Consistent superior high tensile strength wires only
- Greater rigidity due to the one-piece vertical wires
- Smoother and safer non-abrasive forged X knot
- Proven in the field since its conception in 2007
- Easier to install, almost self-supporting
- Save on both labour and posts
- Longer maintenance free life
- Guaranteed to last
- Made in New Zealand by the specialists in high tensile fencing
- Distributed nationally by the UK's leading fencing supplier

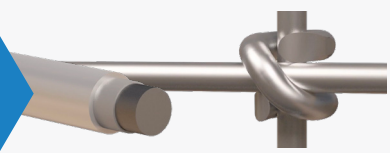
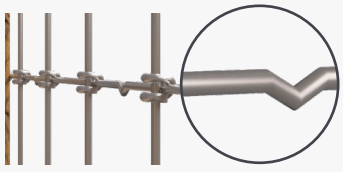
THE 'ORIGINAL' XFENCE

X FENCE
LEAVE NOTHING TO CHANCE

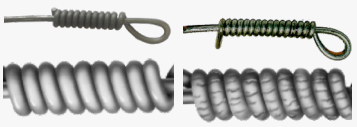


- Manufactured from highest quality primary metals
- 95% Zinc 5% Aluminium
- XTRALIFE coating 24% stronger knot
- Smooth animal friendly abrasive free design forged X knot



- Tension curves absorb any pressure from climatic change or livestock pressure. Reduce by 50% for visible tensioning
- 450mm Pre-stripped ends, speeds up tying off time

- One piece uncut vertical wire
- Acts like its own intermediate, provides real strength & rigidity to the fence, almost self supporting
- Makes installation quicker



- Xtralife coating makes the wire more ductile, easier to work
- Resists cracking when tying off, unlike some heavy galvanised wire

Real return on your investment, not all wire is the same, why gamble?

LONG LIFE FENCE OPTION

Clipex long life metal posts can be used with a line wire system, especially useful when installing a fence line that needs to be trenched in or has a closer mesh pattern

A one piece otter net, easy to install, avoids apron net joining if access allows, it can also be used for dog exercise runs, free range poultry and fishery protection. Bury 50cm straight, 140cm vertical height with a 50cm hinged crank.

Lightweight version available - Hinged apron can be used top or bottom to create apron fold. Can also be used for poultry

X FENCE
LEAVE NOTHING TO CHANCE

XLHT23-240-5 *(Bottom hinged)*

One piece net
Popular design when there is good access to the fence line

XLHT26-180-5 *(Top Hinged)*
XHT19-180-5 apron *(Heavy - No hinge)*
XLHT6-50-5 apron *(Optional)*

Two piece net option
Heavier net option for high pressure areas

XHT13-125-5 *(Top hinged)*
XLHT6-50-5 apron *(Option 2)*

Two piece net
Easier to install where access is restricted
