HYDRAULIC ATV TRAILER SPECIFICATION SHEET

The JFC Hydraulic ATV trailer is particularly suited for All-Terrain-Vehicles (ATV) or Quad bikes. The trailer is fitted with two 4 Ply off road tyres, a galvanised chassis and an easy-to-use Hydraulic tipping mechanism. The heavy duty galvanised frame ensures the trailer is suited to harsh terrain.

Key Features

- Reinforced heavy duty galvanised chassis
- Suitable for heavy loads up to 500kg
- Tough & durable polyethylene body
- Protective steel plate on front lip of body prevents damage on impact
- Hydraulic tipping mechanism for tipping of loads (load capacity 500KG)
- Strengthened rugged axle complete with 4 Ply off road tyres and mud guards
- Fitted with a lever ball hitch

12v Hydraulic power pack specifications

- Fused at 60A
- 800W Motor
- 145 Bar Pressure
- Working Load of 500Kg
- 2 Litre oil capacity
