

THE WIREMAN STRAINEX PRO

StraineX wire tensioner, the easier way to do safer precision straining

The Wireman StraineX wire tensioner kit is extremely simple and easy to use, ensuring full precision control. The lever hoist with the clevis hooks can be used with strainer boards to tension fabricated netting, when combined with Grippers it can strain both plain or barbed wire. Fast and easy to use and remove, clip on/off parts. A one tool must have for every fencer's toolbox.

The StraineX wire tensioner enables you to stand out of the line of the strain, reducing the chance of getting hit should the wire break. The ratchet mechanism can be a slower operation than traditional walkers but they give you precision movement at a minimum of 3mm increments. The digital tension gauge enables you to monitor the exact tension and allows you to erect a wire fence to the manufacturer's specification without over-tensioning. The Wireman range of tools has been designed and built for professional use in the field, offering years of reliability and trouble-free straining. Suitable for short and long runs in excess of 500m.

Steel wire has moved on over the years, high tensile wire being the preferred choice, yet the tools to strain it up have not followed suit. The Wireman Grippers have been specially designed to cope with harder high tensile wire, they are manufactured from a harder grade high tensile BISALLOY® 450 steel than the wire itself, thus preventing wear and slip over time.

There are several kit configurations to choose from which all have the same high degree specification.

StraineX Pro Features

1. Lever hoist has precision tension capacity with 500kg loading
2. Clevis hooks as standard
3. Digital tension gauge
 - Prevents over tensioning - 300kgs in line crane scale
 - Cast alloy body
 - 3 AA batteries supplied
 - 10mm diameter stainless steel U bolt and hook
 - Measures tension in kilos, newtons or pounds
- 4.3 Metre stainless steel chain.
5. Spring loaded Grippers – enable you to grip the wire without maintaining tension on the wire. Spring-loaded scissor action jaws make them easy to attach and release. The springs have been tested to over 18000 cycles. (Grippers can be purchased separately to enable you to upgrade your old style walkers or attach to netting straining boards)
6. **FREE** heavy duty canvas bag
