

ZEBEX® Z3 MESH PANELS

SPECIFICATION SHEET

Available in a range of heights the Zebex® Z3 panels are manufactured from 5mm (nom.) horizontal and 4mm (nom.) vertical wires. The attractive stripe effect is formed by a combination of 195mm x 24mm and 195mm x 40mm apertures. Pressed beams for additional lateral strength are also included within each panel.

The Zebex® Z3 panels are supported on strong 60 x 60mm SHS posts which are supplied with steel fixing clips to hold them sturdily in place.

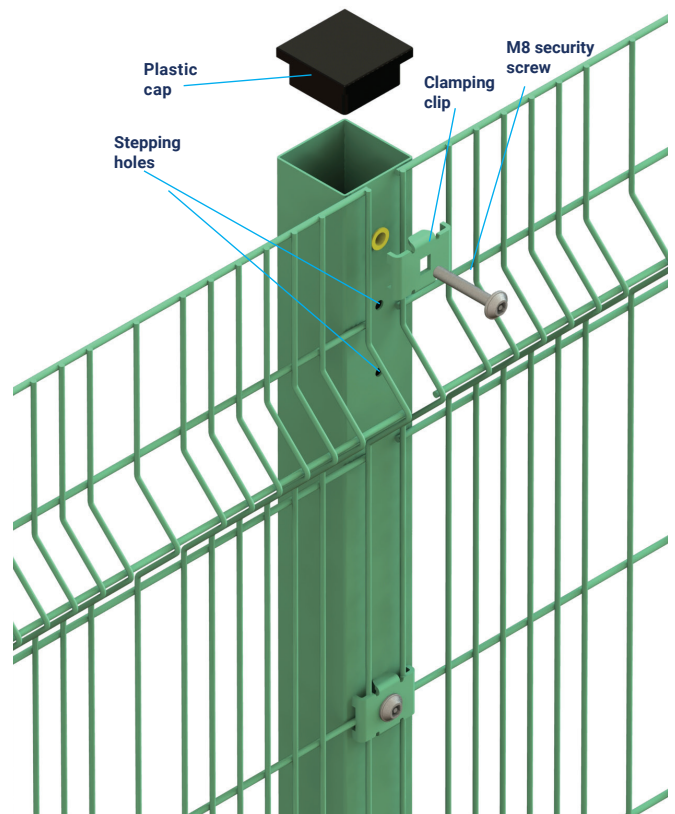

Excellent visibility through the fence and the aesthetic appeal of Zebex® Z3 makes it suitable for a wide range of perimeter applications.

Suitable for :

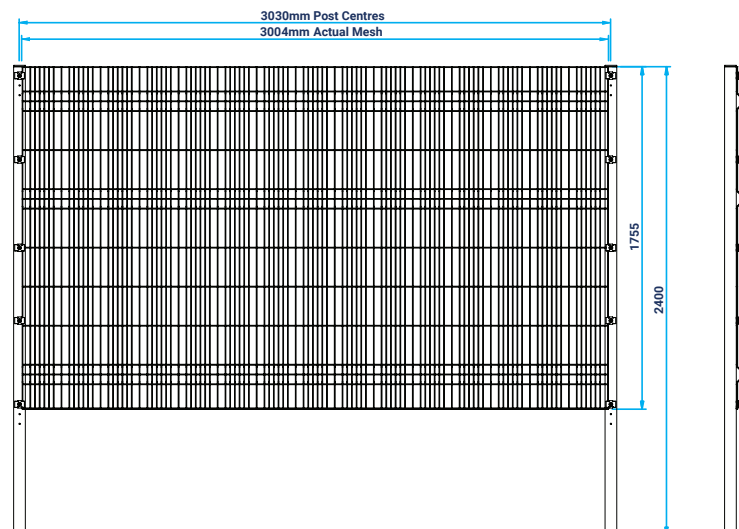

- Distribution centres
- School, colleges & universities
- Commercial premises
- Industrial units

Features
